

## Programmable f/l-f/f converter

### 5223B

- Pulse calculator / frequency generator
- Galvanic isolation
- ATEX I.S. version
- Analog current and voltage output
- PNP / NPN output, optional relays
- Universal supply

#### Advanced features

- The 5223 transmitter can be configured with a standard PC and the Loop Link communications unit, or delivered fully configured.

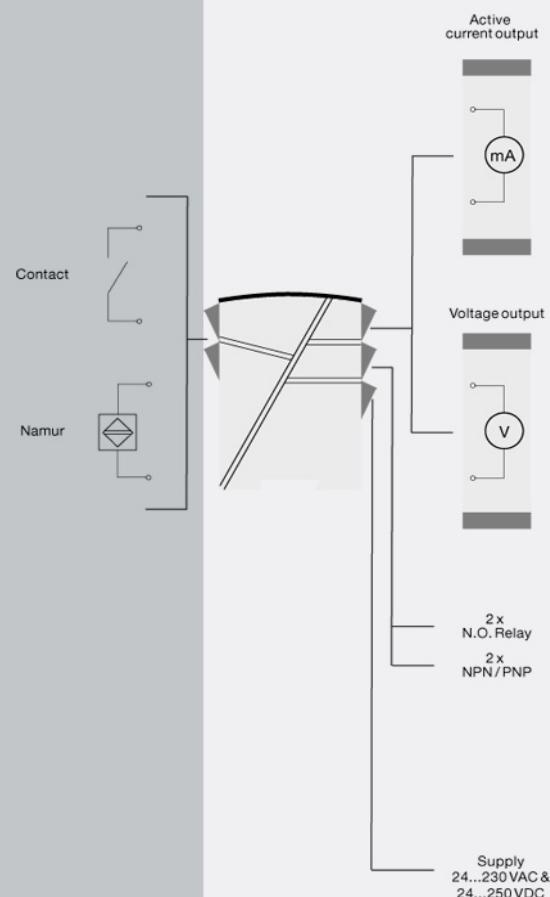

#### Application

- The f/l function performs frequency to current and voltage conversion.
- The f/f function can be used for pulse division or multiplication and as a buffer collecting fast pulse trains.
- A scale factor may be entered in all functions. Using both digital inputs, pulse addition or subtraction are possible.
- The frequency generator function is used as e.g. a time base or clock generator.
- Input and supply polarity reversal protection.
- Current and voltage output signals galvanically separated from the supply and the inputs.
- Programmable digital outputs including NPN, PNP or relay options.
- ATEX units have input for mechanical contact and NAMUR inductive proximity sensor.

#### Technical characteristics

- 5 front LEDs, indicating f1 and f2 active inputs (not NPN), Dig.out.1 and 2 active outputs, and a programmable error signal.
- Analog current output can be configured to any current within 0...20 mA range.
- Voltage output range is selectable between 0...10 VDC and 0...1 VDC by use of internal jumpers.
